

Company Profile

“Providing “one call” engineering services to commercial aquatic/recreational facilities and high technology sites “

Roejen Services was established in 1988 to provide ‘one-call’ engineering services to commercial aquatic / recreation facilities and high technology establishments.

Roejen Services currently provides its services to more than one hundred commercial aquatic and recreation facilities throughout Victoria and New South Wales.

Incorporated in Victoria, with offices in New South Wales, the company has over 25 full-time staff, mainly consisting of engineers and multi-skilled electrical/electronic and mechanical service staff with extensive experience in water treatment, chemical dosing, ozonation/UV systems, facility maintenance and industry training.

Proven Experience in Large Range of Processes:

The company’s range of engineering services includes electrical, electronic, heating and ventilation, mechanical and water circulating systems/filtration, chemical dosing/chlorination systems, ozone generation and UV equipment.

Roejen Services has considerable experience in ozonation and UV systems and services all makes and models of these specialized systems. The company is the largest maintainer of ozone generators in NSW and Victoria.
