**Facility Maintenance // Water Treatment // Membrane Systems  
Chemical Dosing // Ozone // UV // PLC Automation**

## About Us

**Roejen Services Pty Ltd** has been an industry leader in the area of support services to the water industry since 1988.

**Roejen** provides engineering support, project design and implementation and consultative services for the commercial aquatic and industrial water sectors.

We undertake capital and remedial works involving all water treatment processes.

This includes Multimedia Filtration, Chemical Dosing Systems, Ozone and UV systems, PLC and Control systems, Reverse Osmosis and Micro Filtration and various Membrane Technologies

Our Client Base includes major builders, aquatic consultants, waste water consultants and end users such as:

- Industrial Water Treatment Plant Operators
- Aquatic Centre Operators
- Waste Water Plant Operators
- Industrial Process Plant Facilities
- Aqua-culture and Zoological Facilities
- Local Government

**Roejen Services Pty Ltd** is Australia's largest provider of high end engineering services to over 150 commercial water treatment clients.

**Quality Water deserves Quality Service**

## The Company

Roejen has over 35 staff including engineering, and multi-skilled electrical and mechanical trades. Roejen is a licensed electrical contractor (Vic REC No 10969).

Roejen Services has full workshop facilities in both Sydney and Melbourne and provides a 'one-call' '24hr/7days a week' engineering support service to our clients.

## Water Treatment Plant Control

Roejen Services has since 1996 developed the **MechMate** branded PLC control platforms for water treatment processes.

Coupled with web enabled Touchscreens, the plant operator can receive up to the minute diagnostic reports and view plant status graphics. The system can also email and SMS plant faults. The operator can remotely interrogate the system from any convenient internet access location

## Special Services

Roejen Services also provides a number of specialised consultative products including:

- Asset Surveys
- Condition Audits
- Program Budgeting Services
- Operator and Staff training
- Water Chemical and Balancing Analysis
- Engineering Reports
- Preventative Maintenance Routines
- System Design
- 24 hour Tech Support Hot-Line
- Chemical Bunds
- Chemical Storage Tanks
- Switchboard Design and Manufacture
- Plant Automation and Monitoring
- Filter and Underdrain Repair
- Filter Internal Lining and Repair
- DE Systems
- Water Softeners
- GAC Systems

## UV and Ozone

Roejen Services has extensive experience in secondary disinfection and advanced oxidation processes. We provide support for a number of Ozone Generator brands and UV systems.

The company is the largest maintainer of Ozone and UV equipment in Australia.

## Preventative Maintenance and Breakdown Services

Roejen provides cost effective Preventative and Programmed Maintenance and breakdown support to our partnership clients. The PM programs are tailored for the individual sites and provide high quality data and records suitable for accurate program budgeting.

## Custom Dosing Equipment

Roejen will custom design turn-key dosing and automation equipment to interface to your local systems.

## Reverse Osmosis and De-ionisation

The company manufactures and maintains Reverse Osmosis and De-ionisation systems. We have had Considerable success with our **RO-Mate** range of Reverse Osmosis equipment. The **RO-Mate** range provide high quality backwash recovery systems for swimming pool make up water systems.

## Client Base

Our range of clients include:

- Carlton and United Breweries
- Rohm and Haas Australia
- Melbourne Zoo
- Taronga Zoo
- Melbourne Sports and Aquatic Centre
- Sydney Olympic Park Aquatic Centre
- Hoya Lens Australia
- Mingara Recreation Centre
- Melton Waves Leisure Centre
- Kingston Waves Leisure Centre
- Aqualink Nunawading
- Ballarat Hospital
- Carlton Football Club
- Sutherland Aquatic Centre
- Harold Holt Swim Centre
- Macquarie University
- Willoughby Recreation Centre
- Xavier College Swim Centre
- Barker College
- Ashburton Leisure Centre
- Transfield Services Australia

## Associations

Roejen Services is also an active member of the **Aquatics and Recreation Victoria**, the **Aquatic Recreation Institute** the **Australian Leisure Facilities Association** the **Australian Water Association** and the **International Ozone Association**. Our input has lead to many practical initiatives in the aquatic industry Including :

- Development of the Victorian Department of Human Services Pool Operator's Handbook.
- Development of the Pool and Spa Operations Workshops for Aquatics and Recreation Victoria
- Investigation into strategies to conserve or recycle water using backwash recovery or rainwater harvesting techniques
- Implementation of the National Community Recreation Industry Training Package

***We look forward to assisting you with any of our specialised services.***

Our professional team of engineers, sales and service staff would be pleased to discuss your requirements and offer you an independent, cost effective engineering solution for your application.
